

SECOND CEREMONY

Which Unites Miss Grant to Prince Cantacuzene of Russia.

THE EPISCOPAL SERVICE

CELEBRATED BY BISHOP POTTER, OF NEW YORK, AND SEVERAL ASSISTANTS—THE BRIDE'S BROTHER, IN THE ABSENCE OF HIS FATHER, ACTED IN HIS PLACE—THE CHURCH EDIFICE FRAGRANT WITH FLOWERS—MANY DISTINGUISHED PERSONS PRESENT.

NEWPORT, R. I., Sept. 25.—The Episcopal marriage service, supplementing that of the Russian Orthodox Church that was observed yesterday, which made Prince Cantacuzene, Count Speransky, of Russia, and Julia Dent Grant, daughter of Brig. Gen. Frederick D. Grant, and grand-daughter of Gen. U. S. Grant, husband and wife, was celebrated at All Saints chapel here at noon to-day. The assembly of invited guests notable for social and military distinction made the ceremony one of the most brilliant ever witnessed at Newport.

The family and social connections of the bride gave to the wedding a military as well as a diplomatic character, and the little church in which it took place, was bright with blue and gold, the bridegroom's uniform easily outshining those of the home guard.

A large number of the Newport summer colony had delayed their departure to attend the wedding, which came as a climax to one of the gayest seasons ever known at this popular resort.

Right Rev. H. C. Potter, Protestant Episcopal Bishop of New York, officiated, assisted by Rev. Dr. Nevins, of the American Church in Rome, but in accordance with the laws of the State of Rhode Island, Rev. Dr. Porter, of the Emanuel church, of this city, read that portion of the service which legally united the distinguished pair.

A reception followed the wedding ceremony at the Palmer residence and late this afternoon the Prince and Princess left for New York and St. Petersburg.

All Saints chapel, which seats not quite five hundred was well filled half an hour before the time set for the ceremony, and the guests as they waited viewed a wealth of decorations in green and white. The walls and ceilings of the chapel were hung with vines wreaths and white flowers, while the entire altar rail was covered with white roses.

On the altar and chancel were suspended a large number of baskets filled with orchids, intermingled with a chime of snowy floral wedding bells. Large garlands of bride's roses depended from the bells to two Italian columns forming a bowyer which almost hid from view the bride and groom as they stood at the altar. The only music was that of the organ which gave out the notes of the "Lohengrin" wedding march as the procession entered the church doors.

At the same time Bishop Potter and Dr. Porter, vested in the service, entered the chancel from the vestry followed by the Prince and Honore Palmer, a cousin of the bride, who acted as best man by proxy for grand duke Cyril of Russia, who was unable to be present. The bride's father at present is with the army in the Philippines her brother, Ulysses S. Grant, third, a member of the third class at West Point, acted in his place. Mr. Grant were the full cadet uniform.

The ushers were: Potter Palmer, Jr., a cousin of the bride; Lockwood Honore, uncle of the bride; Captain Sartoris, a member of Gen. Fitzhugh Lee's staff during the late war and also a cousin of the bride; Robert L. Gerry, of New York; H. Roger Winthrop, of Newport, and John Prentiss, of New York.

Miss Grant was gowned in white. Her dress was severely cut, but of the richest white satin with a sweeping train and veil of tulle. She carried a shower bouquet of Stephanotis and lilies of the valley, and wore the gifts of the bridegroom, a corsage ornament of diamonds and rope of pearls. The Prince, as he stepped down from the chancel to meet the bride was attired in the full uniform of the chevalier garde, brilliant with red and gold.

At the chancel ushers separated, three passing to one side and three to the other, while the Prince stepped down to meet his bride.

The oral part of the services finished the organ burst forth with the Mendelssohn wedding march and the Prince and Princess led the way to the chapel door followed by the ushers.

Among the congregation, besides the immediate family, were Mrs. Ulysses Grant, the grand-mother of the bride; H. H. Honore, Edwin C. Honore, Mr. and Mrs. Harry Honore, Jr., Mrs. Sartoris, wife of Capt. Sartoris; Maj. Gen. Nelson A. Miles, Mrs. Miles and Miss Miles, and Lieut. Col. Miehler, of Gen. Miles' staff; Major Gen. Merritt and Major Mott, of his staff; Adj. Gen. Corbin, Col. and Mrs. Hein, of West

Point; former United States minister Samuel Thayer, of Wisconsin; Asst. secretary of war, Melkjohn, Chauncey M. Depew and many others.

The reception at the Potter Palmer residence was one of the largest ever held in Newport. The bride couple received under an immense floral arch, with Mrs. Grant and Mr. and Mrs. Potter Palmer standing on the right, while seated near was Mrs. U. S. Grant.

The Prince and Princess started for New York on board the steam yacht Narada.

POSTAL MATTERS.
New Postmasters—Changes in Mail Routes.

Special Dispatch to the Intelligencer.
WASHINGTON, D. C., Sept. 25.—A new postoffice has been established at Rye, Wood county, W. Va., with Thomas H. Pyles as postmaster.

The special service at Lake Logan county, W. Va., from Hewitt, and at Schley, Roane county, from Zona, has been discontinued.

The following changes in the star schedule of West Virginia have been ordered:

Route 16, 276, Belton to New Martinsville, leave Belton daily except Sunday, at 1 p. m.; arrive at West by 4:35 p. m.; leave West daily except Sunday, at 8 a. m.; arrive Belton by 11:35 a. m.; leave West daily except Sunday, at 6:30 a. m.; arrive at New Martinsville by 11:55 a. m.; leave New Martinsville daily except Sunday, at 1 p. m.; arrive at West by 6:25 p. m.

Route 14, 511, Fayetteville to Fayette, leave Fayetteville daily except Sunday, at 8:25 a. m.; and 4:25 p. m.; leave Fayette daily except Sunday at 11:30 a. m. and 6 p. m.

R. M. Stratford has been appointed fourth class postmaster at Sheppard, Mingo county, and W. T. Hamilton has been appointed postmaster, same class, at Sutherland, Kanawha county.

Thomas Mackley has been commissioned as postmaster at Camp, Doddridge county, W. Va.

Howard C. Hefner has been commissioned as postmaster at Fox and George T. Flint at Scott's Depot, both in West Virginia.

Official notice having been submitted of a change in name, an order is issued from the postoffice department to date from September 1, for payment to the Baltimore & Ohio Railroad Company, for service on the following routes: 1,160,111, Weston, W. Va., to Pikesville, 11,606, Flatwoods, W. Va., to Sutton, six miles; 116,634, Clarksburg to Lane's Bottom, 143.98 miles.

An order has been issued to increase star service from Craigsville to Richmond, to three times a week, Tuesday, Thursday and Saturday.

EXCELLENT RESULTS
They Have Resulted in a Steady Gain of Popularity.

People Who are Ever Ready to Recommend What has Done Them Much Good.

Morrow's Kid-ne-olds, the scientific kidney remedy and backache cure, is daily gaining favor in Wheeling. No medicine has ever been sold in Wheeling for kidney ailments, backache, nervousness, sleeplessness and general debility that has gained such popular favor as Morrow's Kid-ne-olds.

We give you the experience of Mrs. C. W. Thurlow, of 2312 Market street, who recommends Kid-ne-olds as follows: "I have been a sufferer from disordered kidneys almost all my life, and was never able to get anything that would cure me. The doctors said my disease was constitutional kidney trouble and that I would never be well again, as my case was incurable. I suffered constantly with an aching pain across the small of my back, and the discharges of the kidney secretions were at times excessive and at other times very frequent, but scant, and attended with pain.

"I had about given up all hope of ever getting well, believing the doctors were right when they said my case was incurable, when read about Morrow's Kid-ne-olds and where they had cured just such cases as mine. An Chas. R. Goetze guarantees them to cure or refund the money. I secured them at his store and began using them according to the directions. It was remarkable how quickly they gave me relief from the distressing pains across my back and the other troubles as well. They cured all the manufacturers claim for them without any doubt."

Morrow's Kid-ne-olds are not pills, but Yellow Tablets, and are put up in wooden boxes, which contain enough for about two weeks' treatment, and sell at fifty cents a box by Chas. Goetze, the druggist. A descriptive booklet will be mailed upon request by John Morrow & Co., Chemists, Springfield, Ohio.

West Virginia Pensions.
Special Dispatch to the Intelligencer.
WASHINGTON, D. C., Sept. 25.—Pensions have been granted to the following West Virginia applicants:

Original—Harrison Ogden, Clarksburg, \$5.
Increase—Charles Eads, Glenwood, \$6 to \$10; Charles Shue, Great Cacapon, \$6 to \$8; Charles H. Platt, Wheeling, \$5 to \$8; Eliza Jenkins, Hudson, \$10 to \$12; Thomas Shaw, Selbyville, \$12 to \$17; Leonard Fisher, Carlisle, \$6 to \$8; Thomas D. Field, Morgantown, \$4 to \$5; John Y. Nary, Wheeling, \$10 to \$25; Henry W. Sease, Egion, (restoration), \$6 to \$14.
Original widow—Sarah A. Heckert, Cox Mills, \$5.
Assassins Condemned.
BELGRADE, Serbia, Sept. 25.—The court this morning rendered judgment in the cases of the prisoners who have been on trial for some time past, charged with the attempted assassination of former King Milan of Serbia. July 8, when he was shot at by a Bosnian. Knad Knezevic, Knezevic and Palitch, the leaders of the conspiracy, were sentenced to death; ten others were condemned to twenty years imprisonment, one to nine years imprisonment, and seven to five years imprisonment. Six of the men on trial were acquitted.

Golden Rule Jones Hasting.
CINCINNATI, Ohio, Sept. 24.—Mayor Jones, of Toledo, "Golden Rule" candidate for governor, arrived here to-day, too late to address a large crowd of "unemployed" that had assembled in Government Square. He made an address to workmen at Chester Park. In the afternoon, early in the evening he spoke to a crowd around Garfield statue and at night made a short speech at the Vine street Congregational church on the application of Christianity to political problems. He left this evening for Toledo.

Stanley's Companion Dead.
LONDON, Sept. 24.—William Bonny, who accompanied Henry M. Stanley, the African explorer, in 1887, in the expedition for the relief of Emin Pasha, and who subsequently received the gold medal of the royal geographical society at the hands of the Prince of Wales, is dead.

IT'S folly to suffer from that horrible plague of the night, itching piles. Doan's Ointment cures, quickly and permanently. At any drug store, 50 cents, 3

PE-RU-NA

BRINGS JOY

That catarrh has any relation to barrenness in women is surprising to many. It is one of the mysteries of catarrh. This insidious disease penetrates to every organ of the body.

Thousands of women have catarrh and are ignorant of it. Dr. Hartman's book for women makes these matters plain. Write to Pe-runa Medicine Co., Columbus, O., for this book and a book of cures effected by Pe-runa.

Mrs. L. M. Griffith, Cambridge, Neb., writes:

"Your medicine did me a wonderful amount of good. It cured me of barrenness. I am 30 years old and had never borne any children; but since beginning your medicine I gave birth to a 10-pound baby girl. She is now six months old and weighs 25 pounds. My friends were all surprised. Some would not believe it until they came to see me. My husband says he never saw such a change in any one as there was in me after I had taken three or four bottles of Pe-runa."

"I am stronger than I have been since I was quite young. God bless you and your medicine forever."

A GAMBLER'S STORIES

Of the Effect of a Run of Bad Luck on the Temper—Hoodoo Who was Having his Shoes Shined—A Full Meal of Baked Beans.

New York Sun: "I have seen some curious effects of continuous gambling in my time," said the old sport, "but nothing to equal the affair I witnessed last Sunday morning. No one but a man who has gambled a good bit and has experienced the same sensations as those which led my friend to such violence as I will describe, will quite understand the frame of mind that he was in, but the old sport will understand it every time, because he's been there himself.

"Pete and I—Pete's my friend, and a rare old gambler—came out of a gambling house on—well, we'll say Forty-third street, last Sunday morning and started for a Turkish bath. Pete had been playing all night, first the wheel, then the dicer and finally poker, and he had lost a good bit of money. As we reached the corner of Sixth avenue, Pete spied a well-dressed young man seated in a bootblack's chair getting his shoes shined. Before I knew what he was going to do, he strode forward, pasted that fellow one between the eyes, remarking as he did it: "You're always getting your shoes shined."

"Yes, I know, the same thing happened to Sheridan, wasn't it? That's no reason why it shouldn't happen to a New York sport too."

"I hustled Pete into a cab in a hurry and before that young fellow had quite recovered from his surprise we were well out of the way. I never said a word until we got to the bath, and then I looked Pete well over and says:

"In the name of all that's good, Pete, tell me why you hit that fellow?" "Why," says Pete, "he's always getting his shoes shined. I knew I'd have to hit him some time, and I just couldn't wait any longer."

"Pete took a long breath, and seeing that I was still puzzled he went on: "Five Sundays ago I came out of that place after an all-night play, a loser. I drank a lot and I smoked a lot, and I was tired. I felt dirty and my face was drawn. I was sore on the world. The first man I struck is this cuss getting his shoes shined, all dressed up in his Sunday clothes, a nice big necktie on, his hair parted in the middle and his moustache waxed. I don't know why, but I hated the cuss the minute I laid eyes on him. It was the same thing the next Sunday and the next and last Sunday I thought I'd have to hit him. He always looked so nice and clean."

"I felt like hitting him a bit. He's been like a ghost to me, and when I came out a loser again this morning, I felt like going home some other way for fear I'd have to look him before we got to the corner. I just couldn't help it, and I want to tell you that I feel a hundred per cent better for it."

"Now what do you think of that? Of course you can't understand it, but if you was a gambler like Pete, you'd see it quick enough. Would you like to hear a story about the effect of a winning streak on beef stew? Yes? Well, you know one of the gamest old gamblers you ever heard of is Denham Thompson, the actor. He's a born gambler and he's at it when he's in his pocket."

"Now that old hypocrite went out arm in arm and made a bee line for a restaurant where they had a meal that reduced the roll to almost \$700."

"I've got one more if you'd like to hear it. Two friends of mine were broke and pretty hungry. One was an indefatigable gambler, the other a man who thought of his stomach before anything else in the world. They stood in front of a Sixth avenue beauty looking hungrily at a pot of pork and beans from which a waiter was taking some for a customer. The hadn't a cent between them, but pretty soon a friend of my game friend came along

and passed out a two dollar bill on request. "Thank heavens, we can have some of those beans now," said the hungry one.

"We can, eh?" said the other. "Well wait a while and we'll see."

"My friend made a bee line for a gambling house, followed by the hungry one, who pleaded with him eloquently to get something to eat first. He was inflexible, however, and a few minutes later he was seated in front of a layout with two dollars worth of checks before him. He won a little and then he lost a little, and every two minutes the hungry one would whisper to him to quit and get some beans. He drew fascinating pictures of that smoking bean pot they had been looking at, but the other was game to the core. He finally had about twenty dollars in front of him, and then began to plunge. The hungry one gasped for breath and finally implored him to give him a quarter check to put aside for beans in case they went broke."

"Not a cent," said the other, "and if you don't shut up I'll kick you out of the place."

"The threat was useless, for the other was too far gone in hunger to fear violence. He kept nagging and nagging at the player who finally got up and threw him bodily across the room. But the hungry one crept back and his first remark was about beans. With an exclamation of rage the gambler jumped up, caught in \$200 worth of checks, dragged him down by the coat collar, to the street and fairly hurled him through the swinging doors of the beauty."

"Give this blankety-blanked idiot \$300 worth of beans," he roared, "and make him eat every one of them."

"Then he stood over the hungry one and made him eat beans for an hour. He wouldn't let him have anything to drink, not even water, and the hungry one's pleadings for bread and butter were in vain. He wanted to quit on his third plate of beans, but the other wouldn't let him. He made him eat beans until he could eat no more, and then he gave him \$50 and left him."

OCTOBER WEATHER.
Many Storm Periods Predicted by Forecaster Irl Hicks.

Words and Works: Until after the middle of October, numerous astronomical causes exist, which indicate many storm and weather perturbations. The Mars period is central on the 26th, extending in its disturbing influence from October 1, to the last of November. We have often called attention to the fact that whatever kind of weather exists at the beginning of a Mars period, the same general characteristic will continue to the end. Changes, of course, will take place, and winter conditions must advance and become more intense; but if warm, open weather prevails the first week or ten days in October, such will be the case to a great extent far into November. But unless the changes indicated in the storm diagram offset or neutralize each other, some violent storms and extremes of temperature may certainly be expected. A few such times, especially when a Mars period was dominant, have passed under our notice, when, instead of storm and rough weather, the most placid conditions prevailed. But so seldom is this the case, with the same causes existing, that we warn our readers to be on the watch.

From about the 2nd to 4th look for a warm wave to pass eastwardly over the country, with a fluctuating, falling barometer, ending progressively in storms of rain, wind and thunder, with snow to west and north very probable, and high northwesterly gales bringing up the rear and causing very sharp and sudden change to colder. Dangerous storms on the lakes and Atlantic should be anticipated at this and other October periods. The mercury period being central on the 4th, with Venus, Earth and Mars combining, the interests likely to be damaged by violent autumnal storms and changes, should be well guarded. Heavy sleet is probable during the first two storm periods of the month in central and northern sections.

The second regular storm period for October is from the 8th to the 12th. Moon being at extreme south declination and first quarter, this period will break up, after low barometer, high temperature and storms of rain, wind and thunder, with cold sweeping gales from the northwest. A decided change to warmer will set in on the 15th, moon being on celestial equator and at perigee on that day. The barometer will fall rapidly at the same time, resulting first in electrical storms, then changing to cold rains with probable sleet and snow northward, from about the 15th to the 18th. A sharp cold wave with frost and freezing will bring up the rear of these disturbances, change to colder, with probable sleet and snow beginning early in the period westward, following up closely as storm centers pass eastward.

About the 20th to 22nd a change to warmer, with general return to storm conditions, will pass from west to east over the country. Moon is at greatest north declination on the 22nd, hence wind currents will likely be warm and southerly during most of this period, but change to much colder will follow from about the 23rd to 25th.

A reactionary disturbance is central, with moon at last quarter and apogee, on the 26th and 27th. This will bring higher temperature, falling barometer and more rain or snow. These disturbances will likely be protracted until moon passes south of the celestial equator on the 29th, and about which date thunder storms will occur, ending suddenly in sweeping winds from north west, high barometer and cold wave.

By consulting the astronomical diagram it will be seen that all the planets, except Earth and Neptune, are near the same celestial longitude, or bunched on the same side of the sun. Notwithstanding all the criticism to the contrary, we believe that the electrical and magnetic equilibrium of the solar and terrestrial phenomena, out of the normal and ordinary will be the result. The truth is, this condition in the planetary family has been reaching a crisis for many months, and all who pay intelligent attention to such things, know that all meteorological records have been broken recently by phenomenal temperature, destructive floods and fatal storms. We do not believe that the things to be expected must of necessity be destructive to life and property, especially where proper forethought is taken; but even the unbelieving, unobserving and thoughtless will see that something out of the ordinary is working in nature's forces.

By consulting the astronomical diagram it will be seen that all the planets, except Earth and Neptune, are near the same celestial longitude, or bunched on the same side of the sun. Notwithstanding all the criticism to the contrary, we believe that the electrical and magnetic equilibrium of the solar and terrestrial phenomena, out of the normal and ordinary will be the result. The truth is, this condition in the planetary family has been reaching a crisis for many months, and all who pay intelligent attention to such things, know that all meteorological records have been broken recently by phenomenal temperature, destructive floods and fatal storms. We do not believe that the things to be expected must of necessity be destructive to life and property, especially where proper forethought is taken; but even the unbelieving, unobserving and thoughtless will see that something out of the ordinary is working in nature's forces.
